Why biodiversity loss hurts humans as much as climate change

We verkeren niet slechts in een systeemcrisis/polycrisis, maar in een existentiële crisis

'Subjectification has to do with the existence of the student as subject of her or his own life, not as object of educational interventions.

Subjectification thus has to do with the question of freedom. Biesta explains that this is not the freedom to do what one wants to do, but the freedom to act in and with the world in a "grown-up" way"

Dissolutie Individualisme -> Interzijn

"To be" is always to "inter-be." If we combine the prefix "inter" with the verb "to be," we have a new verb, "inter-be." To inter-be and the action of interbeing reflects reality more accurately. We inter-are with one another and with all life

We do not exist independently. Everything relies on everything else in the cosmos in order to manifest

I am, therefore you are. You are, therefore I am. That is the meaning of the word "interbeing." We inter-are.

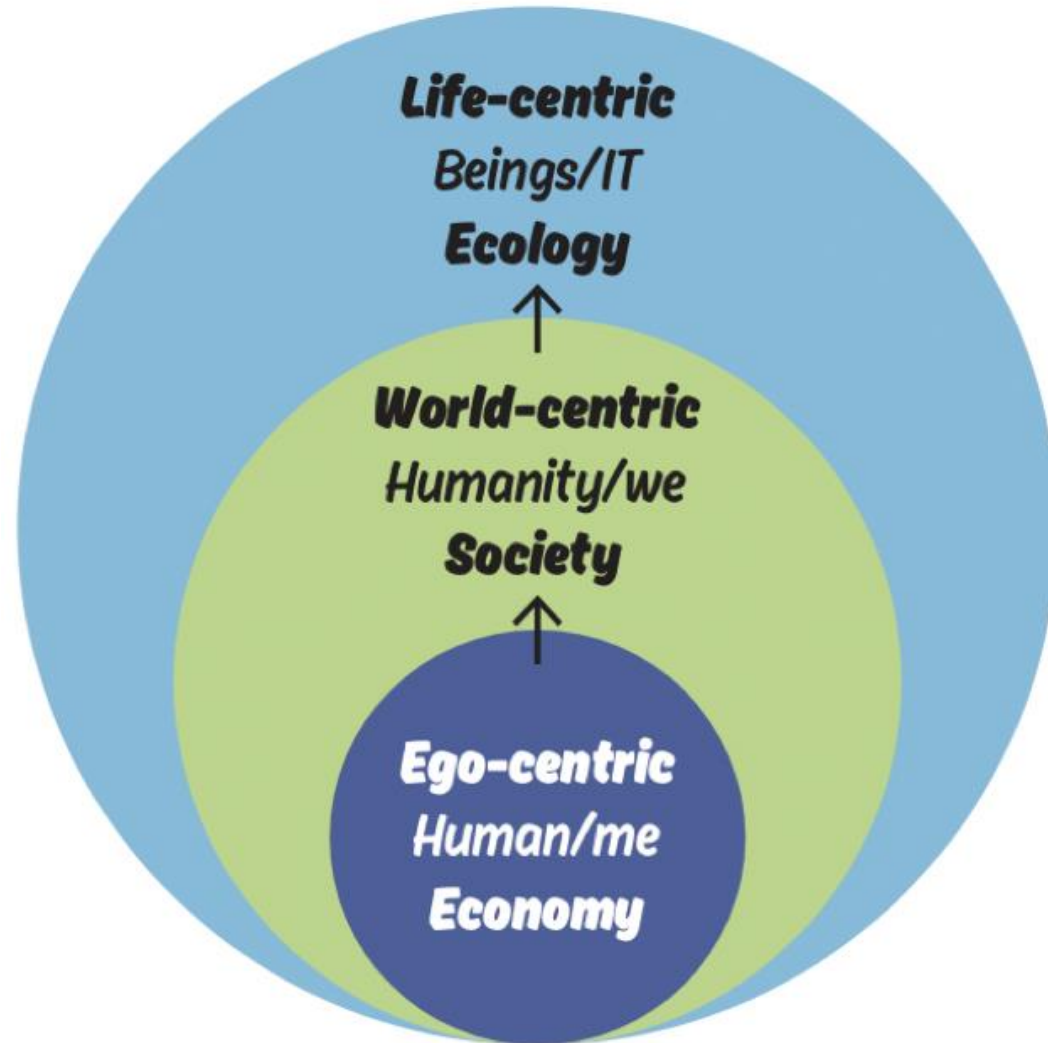

When we perceive interbeing, we see that not only is everything interconnected; we see that all is one and one is all.

The meaning of interbeing recognizes the dependence of any one person or thing as to all other people and objects. It means to inter-dependently co-exist
